

Dual-Core Mobile Application Processor

Multi-core performance is now a critical requirement of new consumer, home, and auto infotainment devices. As computing resource requirements increase, computing power must adapt in response. Applications like web-browsing, streaming video, gaming, and file sharing are growing in complexity as users require faster and more enjoyable content. Allwinner's A20 processor, a dual-core Cortex™-A7 system, delivers a multi-core solution for tablets, smart TV, IPTV, and portable devices that effectively balances system cost, performance, and power consumption.

The A20 processor is based on a dual-core ARM® Cortex™-A7 CPU architecture, the most energy efficient application processor from ARM®. In addition, ARM®'s dual-core Mali400MP2 GPU enables both smooth UI transitions and fluid 3D gaming performance. A20 also enables a full HD video experience with H.264 1080p@30fps encoding and 2160p decoding.

A20 gives customers superior advantages in system cost and time-to-market. A20 lowers system cost by integrating an extensive range of interfaces, codecs, and connectivity including 4-CH CVBS out, VGA, LVDS/RGB LCD, HDMI with HDCP, SATA, USB, GMAC, and audio. A20's pin-to-pin compatibility with Allwinner's previous generation A10 simplifies the product design cycle and enables customers to directly upgrade already-mature single-core platforms directly to dual-core.

Applications

Features

CPU	<ul style="list-style-type: none"> ARM® Cortex™-A7 Dual-Core
GPU	<ul style="list-style-type: none"> ARM® Mali400MP2 Complies with OpenGL ES 2.0/1.1
Video	<ul style="list-style-type: none"> HD H.264 2160p video decoding Multi-format FHD video decoding, including Mpeg1/2, Mpeg4 SP/ASP GMC, H.263, H.264, VP6/8, AVS jizun, Jpeg/Mjpeg, etc. H.264 High Profile 1080p@30fps or 720p@60fps encoding 3840x1080@30fps 3D decoding, BD/SBS/TAB/FP supported Complies with RTSP, HTTP,HLS,RTMP,MMS streaming media protocols
Display	<ul style="list-style-type: none"> Supports multi-channel HD display Integrated HDMI 1.4 transmitter with HDCP support CPU/RGB/LVDS LCD interface Supports CVBS/YPbPr/VGA Integrated TV decoder
Camera	<ul style="list-style-type: none"> Integrated parallel 8-bit I/F YUV sensor Integrated 24-bit parallel YUV 444 I/F Supports 5M CMOS sensor Supports dual sensors
Memory	<ul style="list-style-type: none"> DDR2/DDR3/DDR3L controller NAND Flash controller with 64-bit ECC
Audio	<ul style="list-style-type: none"> Integrated Hi-Fi 100dB audio codec Dual analog mic amplifiers
OS	<ul style="list-style-type: none"> Android 4.2 and above

About Allwinner

Allwinner Technology is a leading fabless design company dedicated to smart application processor SoCs and smart analog ICs. Its product line includes multi-core application processors for smart devices and smart power management ICs used by brands worldwide.

With its focus on cutting edge UHD video processing, high performance multi-core CPU/GPU integration, and ultra-low power consumption, Allwinner Technology is a mainstream solution provider for the global tablet, internet TV, smart home device, automotive in-dash device, smart power management, and mobile connected device markets. Allwinner Technology is headquartered in Zhuhai, China.
